REMARKS

The figures of births and deaths shown in this statement for week ending the 8th September, 1956 relate to 212 towns with an estimated population of 29,399 thousands. The total number of towns is 318 and their population is 41,584 thousands. Thus 67% of the total number of towns representing 71% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 19,186 and 7,372 representing birth and death rates of 33.9 and 13.0 per thousand of population respectively.

(a) States (Parts A and C).—The data here relate to 177 towns with an estimated population of 24,862 thousands. Information about Madhya Pradesh and West Bengal could not be included. The total number of towns is 253 and their population is 33,500 thousands. Thus 70% of the total number of towns representing 74% of the total population is covered. The number of births

and deaths recorded in these towns were 17,110 and 6,535 representing birth rates and death rates of 35.8 and 13.7 per thousand of population respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B).—The data here relate to 35 towns with an estimated population of 4,537 thousands. The total number of towns is 65 and their population is 8,084 thousands. Thus 54% of the total number of towns representing 56% of the total population is covered. The number of births and deaths recorded in these towns were 2,076 and 837 representing birth and death rates of 23.8 and 9.6 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
